

# Are You a Veteran Interested in Research?

**Purpose:** To find out if Veterans with post-traumatic stress disorder (PTSD) have higher inflammation, adrenaline and hormone levels that might lead to a higher chance of developing high blood pressure in the future.

## Are you eligible?

- Healthy Veterans
- Ages 18-55
- Those WITH PTSD and WITHOUT PTSD

## What will I be asked to do?

- 10 study visits over 12 months at the Atlanta VA Medical Center
- Blood draws and needles

Compensation for time and travel provided.
